1 Introduction

1.1 Purpose of Acquisition Functions

1.2 Types of Acquisition Functions

2 Decision-Theoretic Acquisition Functions

2.1 Expected Improvement (EI)

2.2 Probability of Improvement (PI)

3 Information-Theoretic Acquisition Functions

3.1 Knowledge Gradient (KG)

3.2 Mutual Information (MI) and Entropy Search (ES)

4 Acquisition Functions from Multi-Armed Bandits

4.1 Statistical Upper Confidence Bound (UCB)

4.2 Thompson Sampling

5 Constructing Acquisition Functions

6 Computing Acquisition Functions
